People, plans & your dog

One packet per dog. Print and write clearly. Attach extra pages and a recent photo if useful.

Use this to help us understand your dog. It is not an ownership-transfer contract, a trust, or confirmation of intake. Please contact Justin before making a handover plan.

Dog’s name, nicknames and date this packet was completed

Owner / guardian name; person completing this packet and relationship

Best contact: phone, email, general location and preferred way to reach you

Authorized representative / executor contact, if applicable; authority to discuss with Justin

Timing and type of help needed; current caregiver and backup contact

Call (530) 643-1107 after 8 AM Pacific or email 1lovedogrescue@gmail.com. Share only what is needed about the transition; no human diagnoses, identity documents, bank details or passwords here.

Meet my dog

Dog’s name: _____ Date: _____

Age / date of birth (estimated if unknown), breed / mix, sex, spay / neuter status

Weight, color, distinguishing marks and microchip information / registry

How long has the dog lived with you? Previous homes or history you know

Favorite people, games, toys, treats, places and ways to show affection

Dislikes, worries, fears, triggers and what helps the dog feel safe

Health & veterinary care

Attach current veterinary records. Write “unknown” where needed; do not guess about treatment.

Veterinarian / clinic, phone and who can help arrange release of the dog’s records

Known conditions, allergies, pain, mobility, dental or other ongoing care needs

Vaccines, parasite prevention and recent procedures / results (dates or records attached)

Medication / supplement name, prescribed dose, route, schedule and prescriber

Last doses given, refill needs, storage and administration instructions

Supply labeled medications and veterinarian instructions. Continue only the veterinarian’s directions; this packet is not a prescription. For an animal medical emergency, call an emergency veterinarian.

Daily routine & comfort

Dog’s name: _____ Date: _____

Food brand / type, amount, meal times, treats and dietary restrictions

Potty routine, house-training, accidents and how the dog signals to go outside

Walks, exercise, leash / harness habits and physical limits

Sleep location, crate experience, home-alone routine and separation distress

Grooming, handling, bathing and favorite comfort items to send along

Behavior, relationships & safety

Details help us plan safe care. Include dates and circumstances; add pages for fuller explanations.

With children, adults, strangers, dogs, cats or other animals; any limits on contact

Bite / snap / injury history: who or what, when, circumstances, injury and follow-up

Guarding food / toys / space, escape attempts, chasing or other safety concerns

Training, words / cues, rewards, introductions and handling that work best

Handover & optional support

Dog’s name: _____ Date: _____

Usual intake fee: $100 toward initial veterinary care and other intake costs. We can and will normally waive intake fees under extreme circumstances. Discuss hardship and confirm the fee or waiver directly with Justin.

Items / records to bring; meeting arrangements to confirm with Justin

Anything else the next caregiver should know about your dog

Optional: would you like to discuss a care fund, memorial gift or weekly support? Best contact

Additional gifts and sponsorships are optional and separate from intake. For a future care fund or estate gift, discuss the plan with Justin and an estate-planning professional before committing funds. Do not enter financial account details here.

Weekly recurring support must be arranged directly with Justin. Agree on the amount, start date, adoption notification and cancellation responsibility. Weekly checkout and automatic stopping at adoption are not active on the website. Monthly PayPal gifts must be canceled separately.

Before handover, confirm acceptance, authority to surrender, the written surrender agreement, fee or waiver, records, medications and familiar supplies. Keep a copy of this packet and update it if care needs change.
